

How to File a Lawsuit Against a Company

#1 Gather Evidence

- Photographs
- Videos
- Police, medical, and insurance records
- Correspondence: Emails, certified mail receipts, phone records

#2 Hire an Attorney

Be careful to choose an attorney that is both knowledgeable and personable. You will be working with them a lot as they build your case and represent you in court and legal discussions.

#3 File a Claim

While your attorney files the claim, it is important to get to them within the time frame of your state's statute of limitations. In Alabama, that is two years from the date of the incident.

Whether you are looking to hire an attorney or would simply like to ask a few questions regarding your potential case, please consider scheduling a consultation.
